## OCCUPATIONAL THERAPIST

---

### English Skill Check 1

Answers will vary. Look for responses that suggest the occupational therapist used a calm, professional manner and displayed tact, empathy, and patience; body language that included, for example, touching the parent's hands or shoulders. Parents might ask about their daughter's long-term prognosis, how she can compensate for her disability, the length and frequency of treatment, or the type of activities carried out during therapy.

### English Skill Check 2

Answers will vary. Suggestions:

O: The family listened to my explanation but had more questions.

A: The family may need more answers.

P: I will meet with the family to discuss Melissa's progress and answer questions twice a month.
