

*“I can’t just open a book and read something and then understand it. I need to try it out so it makes sense to me. I’m smart, but I didn’t make good grades in my academic classes because I couldn’t see how the words related to something I knew or cared about. That’s what I like about **Hands on Academics for Careers**. It gives me a taste of how I would have to use academics in different jobs.”*

For students who learn best by applying what they read

For Students

- Careers across pathways
- Typical math, science, English, social studies activities performed on the job
- Critical thinking, Workplace politics, News, Entrepreneurial problem solving
- 69 modules targeting specific careers, 20-30 pages each
- Challenge activity in one academic area for each career module
- Websites to supplement activities in each career module
- Career information and career vocabulary for each module
- Assessment with instant feedback for each career module

The Teacher’s Desktop

- Class roster
- Ability to select and require lessons
- Options to establish minimum score and reset lessons
- Simple score reporting, exportable to Excel
- Multiple rosters by classes or schools

Instructor’s Guide

- Standards from the national academic associations
- Academic correlations
- Activity solutions
- Teacher Suggestions
